## PSA: Stock up on Grains/Legumes & S1lver <-- solution

Rule 3: Posts must be on-topic, focusing on collapse.

---

Right now is still a good time to be stocking up on wheat, barley, beans, lentils, millet, spelt.

**Learn how to store it well. Wheat can last 30 years if stored right. If not stored right, it will be a waste.**

You can't eat Silver.

You can't eat toilet paper.

The Solar Minimum is coming,

time to learn how to survive it.

Store more next year. Start to make a habit of eating whole grain and beans, because meat will be too uneconomical going forward.

"Plant-based foods like wheat generally produce significantly more calories per acre compared to meat. For example, wheat can yield around 5,400 pounds of food per acre, while beef production is much less efficient, requiring more land and resources for fewer calories." - DuckDuckGo.

Ezekiel Bread Recipe from the Bible:

---

Ezekiel bread is based on a specific recipe found in the Bible, specifically in Ezekiel 4:9. This recipe is unique and has historical significance. **It has the right combination of proteins and carbs and hexaploids/tetraploids.**

Ingredients

The ingredients specified in the biblical passage are:

- \* Wheat
- \* Barley
- \* Beans
- \* Lentils
- \* Millet
- \* Spelt

Cooking Method: According to the scripture, Ezekiel was instructed to cook the bread over human excrement, but he was later allowed to use cow dung instead. This aspect highlights the dire circumstances during the siege of Jerusalem. (**JAE: No, this is because of the need for pro-biotics on this diet**).

Daily Ration: Ezekiel was to eat this bread for 390 days, consuming a limited amount each day, which was about 20 shekels (approximately 8 ounces) of bread.

#### Nutritional Aspects

Ezekiel bread is known for being high in protein and fiber due to the combination of grains and legumes. It is often considered a nutritious option compared to regular white bread.

#### Modern Adaptations

Today, many recipes for Ezekiel bread use sprouted grains and may include additional ingredients like honey or olive oil to enhance flavor and texture. However, the original recipe serves as a reminder of the historical context and the symbolism of scarcity and survival.

---

**IBS/Leaky Gut/etc are likely mitigated by the combination of vitamins/pre/pro-biotics/electrolytes in many cases.**

I also want to emphasize the need for pro-biotics, pre-biotics, sufficient electrolytes (all sodium, potassium, magnesium) on this diet.

Store the grain and keep researching how to remove glyphosate from it.

By end of 2027 it will be clear how best to remove glyphosate from within the grain itself. This is an active area of research.

Don't let them censor the research.

Farmers don't always follow instructions; some will need to go against directions to survive financially.

We can help them by buying and stocking grain. Then they won't have to cut corners and can survive while being honest.

Grain like wheat will survive 30 years in storage.

Believe it or not we will need to learn how to do this in a decentralized way as a society.

This is how you prevent a totalitarian government during a period of hunger; ala the Holodomor.

Also, higher food prices and local stocking actually help prevent unmitigated migration.

Bill Gates knew it was coming, so bought farm land.

**Beware of glyphosate; and likely there is a way to remove it using chlorine dioxide or ozone and water and light. Research. Share. Buy organic.**

## # The Silver Bullet

**The dollar is going to collapse. You also need to hold physical silver.**

Extremely informative (linked video) but misses an even bigger picture.

Silver supply is still "elastic" in the sense that industry largely \*consumes\* silver. Silver will not reach 100x in value just because of industrial demand, because more can always be mined, and batteries can always be smaller.

This video advises you to buy silver mining stock, while hypothesizing that the government will seize your silver bullion. It is the other way around.

The people will not accept the seizure of silver coins/bullion when the government can seize silver mining corporate stock. Seizing silver mining corporate stock gives the government more control over the mines themselves, which is ultimately what it needs.

The coming psychological war is whether to take silver from silver stackers and your grandma's pantry, vs to take silver from the mining companies.

## # People vs Bankers.

People \*will\* become aware of this, and demand that the government respects the private ownership of silver bullion. Indeed it is ludicrous in the grand scheme of things to steal from the citizens who need their savings to let the rich get richer.

This meme will enter the public consciousness and skyrocket the perceived value of silver as representing the will of the people. This is not a market step function, it is a memetic explosion.

This silver bullet will end the FED, COMEX, and make SILVER the new means of exchange, again.

The global prison AI matrix will suppress this meme with all of its force. This information will be plainly visible on gno\_land which will be known as web7. (\$atone \$photon \$gnot)

**[youtube.com/watch/?v=VajTt1hrT4k](https://youtube.com/watch/?v=VajTt1hrT4k) <-- this guy is AI and often fake news but this video in particular is good and explains the silver war that has started esp due to silver battery tech. It is likely by JPMorgan trying to mess with our heads. JPMorgan hates me because I know why JPMorgan sank the titanic to off Straus and set up the federal reserve system.**

Time is short to prepare if you don't have much cash on hand. And many people are broke.

### NOAA confirms a 'full-blown' Grand Solar Minimum

Their press releases surely won't admit it, but NOAA's [PREDICTED SUNSPOT NUMBER AND RADIO FLUX](#) data appears to show a 'full-blown' Grand Solar Minimum running from the late-2020s to at least the 2040s.

NOAA (who's solar forecasts generally come out higher than NASA's) say it won't be until mid-2025 before we see the peak of the next Solar Cycle (25), with the maximum topping out at 114.6 sunspots:

Hi, AnnualArcher8514. Thanks for contributing. However, your submission was removed from [r/collapse](#) for:

Rule 3: Posts must be on-topic, focusing on collapse.

Posts must be focused on collapse. If the subject matter of your post has less focus on collapse than it does on issues such as prepping, politics, or economics, then it probably belongs in another subreddit.

Posts must be specifically about collapse, not the resulting damage. By way of analogy, we want to talk about why there are so many car accidents, not look at photos of car wrecks.

Please refer to our  [subreddit rules](#) for more information.

Mods: please read the whole thing. It is really important to understand.

NOAA just announced the GRAND SOLAR MINIMUM.

WHEAT PRICES HAVE BEEN GOING UP SINCE I POSTED AND SHARED THIS ON X AND OTHER FORUMS.

SILVER PRICES GOING UP IS RELATED TO THE DOLLAR COLLAPSE AND SILVER BATTERIES.

I am busy writing a whitepaper to launch a censorship proof truth platform to complement reddit etc to help humanity.

I sent a message to mods, looking forward to your answer.

Furthermore there are other forums that already discuss this where I posted it.

It would be a great disservice to this community if they didn't react in time because of moderator disapproval.
